SOFTWARE ENGINEERING BOOTCAMP
Aug 2022 - Dec 2022

LANGUAGES

- English
- Spanish
- Catalan

Full-stack developer with a strong focus on front-end development. Skilled in React, JavaScript, HTML, CSS, and modern front-end frameworks, with a passion for crafting intuitive interfaces and pixel-perfect, accessible designs.

Proficient in tools like Figma, Canva, and UI animation, I create visually compelling and user-centered experiences. I thrive in cross-functional teams, working closely with designers, developers, and business strategists to build web solutions aligned with business goals.

Collaborative and adaptable, I bring strong problem-solving skills and a keen eye for detail. I'm passionate about continuous learning, innovation, and teamwork, always striving to elevate both the technical and creative aspects of web development.

WORK EXPERIENCE

Jump Juice — Dublin
Supervisor — August 2024 - May 2025

- Managed a team of 10 people and improved operational efficiency by better distributing tasks.
- Optimised production and service times, reducing waiting times by 25% and increasing the speed of order delivery.
- Controlled stock and optimised purchase orders, reducing waste by 5% and ensuring product availability.
- Trained staff in good hygiene practices, food handling and customer service.
- Managed the till and performed daily cash counts, ensuring 100% accuracy of transactions and sales closures.
- Coordinated strategic promotions and offers, which helped increase sales.

Haddock — Barcelona
Full Stack Developer — January 2023 - December 2023

- Developed and maintained web applications using React, TypeScript and Tailwind CSS, ensuring modular, scalable and maintainable code.
- Developed and optimized backend functionality using Node.js and Express, improving data management and communication with the frontend.
- Designed, optimised and administered PostgreSQL databases, ensuring data integrity, efficiency and scalability.
- Performed unit and integration testing using Jest, increasing code coverage by 35% and reducing bugs by 10%, ensuring greater reliability and stability in production.
- Collaborated with the UX/UI team, implementing accessible and responsive interfaces, ensuring an excellent user experience.
- Integrated and consumed RESTful APIs to enable seamless data flow between services and external platforms.
- Participated in agile ceremonies (daily standups, sprint planning, retrospectives) and contributed to defining technical requirements and architecture decisions.

Barcelona epidemiology service — Barcelona
Administrative — November 2020 - December 2022

- Managed data statistics related to the Covid-19 pandemic, ensuring accuracy, confidentiality, and compliance with health regulations.
- Collected, analyzed, and interpreted epidemiological data, identifying trends and key insights to support public health decision-making.
- Created statistical reports and visualizations, improving the understanding of virus transmission patterns and the effectiveness of containment measures.
